04. DevReview

AI-Powered Code Review & Developer Collaboration Platform

Concept: Developers connect their GitHub repositories and receive automated code-quality analysis and review suggestions.

Features

- GitHub repository integration.
- Pull request tracking.
- AI code review suggestions.
- Bug and security issue detection.
- Code quality score.
- Team review comments.
- Review history.

Development stack: React, Node.js, Express, MongoDB, GitHub API, Webhooks, Socket.io, LLM API.

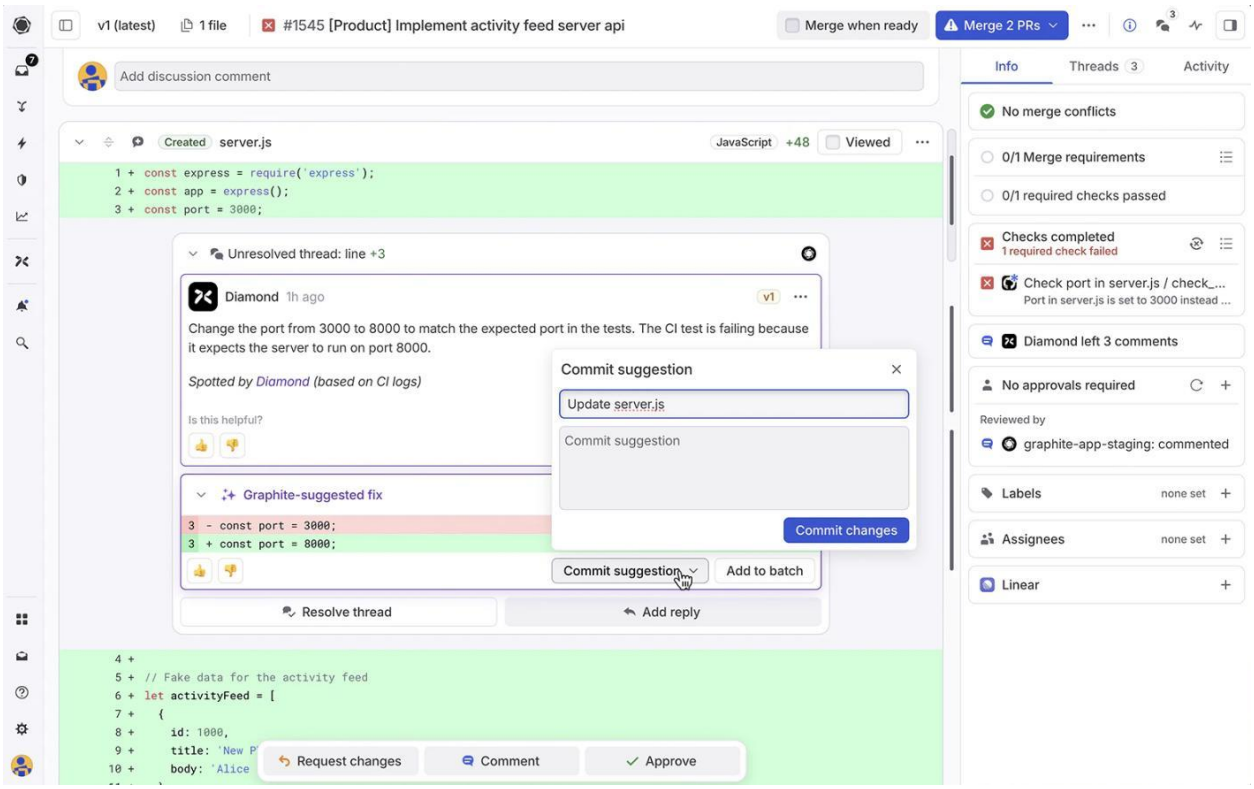

Database models: User, Repository, PullRequest, Review, Finding, Comment.

Development phases

1. GitHub OAuth integration.
2. Fetch repository and pull request data.
3. Build code-diff viewer.
4. Implement AI review service.
5. Add review collaboration.
6. Generate repository quality reports.

Placement value: GitHub APIs, webhooks, code analysis, and developer tooling.

Diamond 1h ago
v1
Change the port from 3000 to 8000 to match the expected port in the tests. The CI test is failing because it expects the server to run on port 8000.
Spotted by Diamond (based on CI logs)

Check port in server.js / check_...
Port in server.js is set to 3000 instead ...
